

Curriculum Vitae for David Leeming (updated Jan 09)

Family name: Leeming
First names: David
Date of birth: 19-11-1962
Nationality: UK
Civil status: Married (to Solomon Islander)
Contact details: P.O. Box 652, Honiara, Solomon Islands
Tel: (+677) 76396(m) 26538(w) 24419(h)
leeming@pipolfastaem.gov.sb
Skype: davidleeming

Home address (UK): 22 Lingmoor Rise, Kendal, Cumbria, LA97NR
Tel: +44 (0)1539 723020

Main area of expertise: ICT for development, educational technology, distance learning, rural development, rural networking, ICT capacity development, ICT strategy planning

Most recent long term positions:

Coordinator for One Laptop Per Child (OLPC) in Oceania, Secretariat of the Pacific Community (SPC). Part time contract started 1st June 2008, based in Honiara, working in all Forum countries.

Project Manager, Distance Learning Centres Project, Education Sector Investment and Reform Programme, Solomon Islands. (STABEX 99). Long term EDF (EU) external TA contract, Dec 2004 – Dec 2007. Project site www.schoolnet.net.sb

Availability: From March 2009.

Short Summary: I am an expert in ICT for development, international consultant and project manager, with 12 years experience in the Pacific Islands region. My focus is on ICT for education and sustainable rural development. I am best known as the Technical Advisor to the Solomon Islands People First Network (www.peoplefirst.net.sb), and more lately for a focus on the delivery of education services to remote areas, as manager of a project establishing distance learning centres connected with VSAT broadband Internet in Solomon Islands (www.schoolnet.net.sb).

My key experience is in the fields of ICT for Development; ICT for education, distance learning and eLearning; educational technology and distance learning; in particular concerning access for remote rural communities, eGovernment and ICT strategy and participatory methods in rural development. My work in Solomon Islands and PNG is replicable across the region and in other regions such as Africa.

A research scientist by training, I have worked in International Development since February 1996 in the Pacific Islands region. I have experience at International level with EU (I am an experienced E\$DF project manager), UNDP and AusAid programmes. My main work has been in Solomon Islands where I helped UNDP to launch a sustainable rural ICT network, the People First Network, and then mobilize donor funding and build partnerships to successfully up-scale it to national level. PFnet is now world-recognised best practice project; and is quoted as such in UNDP publications and a report commissioned by AusAid on the Virtual Colomobo Plan (Curtain, 2003).

Since 2004 I have been focused on the educational aspects of ICT for development, as Project Manager of the EU-funded Distance Learning Centres Project (DLCP) for the Ministry of Education. This work is also recognized as best practice in the region; I was asked by the Pacific Islands Forum Secretariat to present the DLCP as a case study with recommendations to the Forum Education Ministers Meeting, held in Auckland, Nov 29th 2007 and attended by Education Ministers from the entire region. This constitutes advice given on a regional basis.

Three key areas where I have been playing a leading regional role in ICT for education are:

1. Facilitating Learning4Content (Wikieducator) workshops across the region (so far Solomons, PNG, Nauru, Samoa) on behalf of the Commonwealth of Learning. This programme empowers educators to collaborate and develop open educational resources.
2. I have been a key member of a small group of regional experts working to bring the "One Laptop per Child" (OLPC, popularly known as the "\$100 laptop") programme to the region. As a result of this, a regional series of trials is now being implemented by the Secretariat of the Pacific Community, and I have been made Coordinator these trials.
http://wiki.laptop.org/go/OLPC_Oceania.
3. Following my work with the PFnet and DLCP, in association with the Solomon Islands Government and SPC, I have implemented wireless wide-area networks in the Marovo Lagoon area, extending VSAT connectivity to more schools and communities, and in the process demonstrating the utility of the technology and how community-level partnerships can be built to sustain the networks.

Thus, I have been working as a leading regional expert in the areas of access, content and capacity for ICT in Education.

I have also made leading contributions to national ICT strategy development in the region. I have contributed to several international conferences on ICT for development and ICT for education and have published papers in international journals. This is an ongoing discussion in Solomon Islands.

I am a member of the Pacific Islands Internet Society (PICISOC) organised an ICT in Education theme for their 2007 PacINET conference in Honiara, August 2007. I also have more general experience in the deployment of appropriate technology, including solar power for remote schools and communities. I have worked in collaborative activities in the region, for instance the regional consultations for the World Summit on the Information Society (WSIS).

One of my key strengths is my experience at all levels working with grassroots right up to advice given at senior government level. For instance, I have served as a teacher for three years in remote islands schools in the Pacific (with VSO), and from my work with PFnet, I have a broad experience of working with village communities and stakeholders to develop partnerships for development. I am consequently able to use this understanding to good effect when advising the government, as I do now; for instance on the sustainable use of ICT for the delivery of education in remote areas, and collaborative learning and content development.

I am Managing Director of a newly Solomon Islands-incorporated company Leeming International Consulting that has been established to provide services in project and resource management, ICT for development, educational and distance learning technology including content development and remote area access. The company is founded on strong local knowledge, expertise and local networks.

Education:

1981-1985 Salford University, UK

BSc (hons) 1st Class, Electronics and Acoustics. 2 University prizes.

Language skills: (1 - excellent; 5 - basic)

Language	Reading	Speaking	Writing
English (1st language)	1	1	1
Solomon Islands Pidjin	2	2	2
Polynesian (Rennellese)	4	4	5

Areas of Expertise:

International Development:

- ICT for Development (in particular in education)
- eLearning and ICT for distance learning, SchoolNets
- Open Educational Resources (OERs), collaborative resource development using ICT
- Sustainable rural communications and networking

- ICT for sustainable rural development
- ICT strategy and policy development
- I am a regional expert on the One Laptop Per Child programme
- E-government and e-governance
- Project management
- Research and research management (scientific, impacts of ICT in development)
- Training and technology capacity building
- Remote area power supplies, solar electrification
- 10 years experience of community development in Pacific island communities
- 3 years secondary teaching experience in rural Pacific Islands schools (VSO)

ICT skills

- ICT for sustainable rural networking and delivery of services to remote areas
- HF radio email systems
- VSAT (satellite broadband) networking
- Wi-Fi and other remote and wireless access technologies
- Learning Management Systems (including Moodle, ATutor), synchronous and asynchronous interactive platforms and tuition tools
- Content development / course authoring systems / WikiEducator
- Interactive DVD
- Worldspace radio hybrid satellite broadcast access
- Databases (MS Access, MySQL)
- Project management (MS project), General computing, computer modeling, software development
- Network administration (monitoring, firewalls, content keepers, server applications)
- Website technologies (ASP, CMS, PHP, open source)
- FOSS, open source technologies (Linux, diverse applications)
- ISO 9001/TickIT software QA
- Active member of Pacific Internet Society
- Involvement in the World Summit on the Information Society Pacific consultations, 2002
- Member of Global Knowledge Partnership (through Rural Development Volunteers Association)
- Member of volunteer group working

Other

- Health and Safety
- Quantified Risk Assessment
- Risk/Vulnerability Science
- Acoustics

Referees:

(1) Edo Stork, United Nations Development Programme (UNDP), Change Management Specialist, Bureau of Management – Management Consulting Team (MCT)/Centre for Business Solutions (CBS), New York
tel: +1 212 906 6388 Email edo.stork@undp.org

(2) Wayne Mackintosh, Education Expert (ICT), Commonwealth of Learning, Vancouver, wmackintosh@col.org

(3) Dr Jimmie Rodgers, Director General, Secretariat of the Pacific Community. jimmier@spc.int

(4) Prof. Abdul Mannan, Director, University of Papua New Guinea Open College, mannanma@upng.ac.pg

Professional Experience

Date	Location	Company	Position	Description
Feb 09 – March 09 20 days part time	Solomon Islands	Commonwealth of Learning	Project manager / consultant	This project is contracted to my company Leeming Consulting. It concerns building communities under COL's Learning4Peace programme. The project will work with existing women's and youth communities and build capacity for networking, collaboration and collaborative development of learning resources under the Learning4Peace theme.
Jan 09 40 days part time	Solomon Islands	Linpico Ltd. EDF funded	TA	Provide follow-up TA to the DLCP project of the EU and NZAid funded Education Sector Investment and Reform Programme (I was Project Manager of this project 2004-2007, see below for details). This part time contract focuses on developing the main streaming of DFL within the education sector starting with teacher professional development, and technical areas such as training in the introduction of Moodle and expanded VSAT networking with community access, and an evaluation of the OLPC trials ongoing.
June - Dec 2008 (6 months part time)	Regional Pacific Based in Solomons	Secretariat of the Pacific Community	Coordinator, One Laptop Per Child Oceania programme	Coordinate and implement strategies, and programmes of trials in all member countries for the One Laptop Per Child (OLPC) Oceania programme of SPC under the Pacific Digital Strategy. This involves liaison and coordination with Ministries of education, NGOs and other partners, in 8 countries initially participating in trials with others to follow. Implementing the initial trials in collaboration with all local and regional partners. See http://wiki.laptop.org/go/OLPC_Oceania
Jan 2008 – June 2008 (short inputs)	All 8 Pacific Islands countries of the Commonwealth	Commonwealth of Learning	Consultant / workshop facilitator	Running "Learning4Content" training workshops on collaborative content development for educationalists, one in each of eight Commonwealth country of the Pacific Islands, on collaborative resource development using the WikiEducator (www.wikieducator.org/Learning4Content) on behalf of the Commonwealth of Learning. The courses will be attended by key champions of education in each country, teachers, Ministry officials, curriculum development officers, etc. These are the first of up to 100 such workshops worldwide – I have been pioneering them for COL. I have also written a Facilitator's Guide.
Nov07 - Sept 08	Solomon Islands	Secretariat of the Pacific Community	Consultant 20-day part time (x 2)	(a) To establish a wireless educational network in Marovo Lagoon, Solomon Islands (b) To complete preparations for proposed regional trials of the "One Laptop Per Child" programme (c) To consult with communities in Marovo Lagoon in preparation for the planned pilots of SPC's Rural Internet Connectivity System (RICS) This work allowed me to complete my expert inputs into components of an educational pilot started under the Distance Learning Centres Project (previous post). These inputs are critical to the regional pilots of OLPC and RICS – regarded by SPC as components of the Pacific Forum's Digital Strategy to reach out to remote and rural communities. This work has been extended in 2008, with a further contract to implement wireless networking in central Marovo Lagoon and establish community-level partnerships focused on education ad community access.
Nov/ Dec 07	Solomon Islands	UNDP	Consultant 10 day part time	Consulting and advice to Isabel Province Development Programme, Solomon Islands. Identification and recommendations on programming linkages for the Isabel Province e-Government and e-Governance system. Technical advice provided on the interconnection of rural networks, including People First Network (PFNet) email stations, community FM radio stations, distance learning centre and HF radio networks. Identification of e-government linkages by sector and e-governance linkages related to the Province's planning cycle, to enable increased participation and engagement of citizenry in the planning and development process. Output: report (available on request with permission of Honiara sub-office).

Professional Experience

Dec 2004 – Dec 2007	Solomon Islands	EU long term international TA, Ministry of Education, Solomon Islands	Project Manager 3-years full time	<p>This was a long-term EDF Technical Advisor position. As Manager of the Distance Learning Centres Project (DLCP) I managed a team of 11 project staff and 6 staff of the People First Network (PFnet), with a total budget of SBD 11 million (EUR 1.1m) over 4 years. Owing to the 50% rule, my contract as Manager could not be extended and I worked towards localising the project management post before I finished in Dec 2007.</p> <p>The Distance Learning Centres Project (www.schoolnet.net.sb) is an EU-funded component of the Education Sector Investment and Reform Programme (ESIRP). It is being implemented for the Ministry of Education and Human Resource Development by the People First Network (PFnet) of the Rural Development Volunteers Association (RDVA). It is a 3-year project, that is now extended until the end of 2009. The project has established a pioneering network of distance learning centres hosted by rural community high schools in each province and equipped with broadband Internet through a newly established VSAT network. The centres are run as multipurpose community telecentres, building on PFnet's sustainable rural networking experience, and are expected to have wide impacts in rural development.</p>
<p>The project also worked closely with the Ministry to focus on the role that distance and flexible learning (DFL) can play across the full spectrum from literacy, vocational, continuing to academic education and training. The DLCP works with the divisions of the MEHRD to identify and pilot ways in which DFL and ICT can be leveraged to improve both the delivery and the quality of education. I have advised also on vital issues of sustainability and policy development, working with a specially-created Technical Working Group on distance and flexible learning.</p> <p>The DLCP is also piloting innovative technology to reach out to more of the population, especially in remote and rural areas. The One Laptop per Child (OLPC) programme is an example of such a technology that might help solve the problem of rural access. As Project Manager, I realized the potential of OLPC and worked with a small group of regional experts to develop proposals for a regional Trial of OLPC for Oceania, specifically linked to the DLCP. The Trials will continue, to provide data upon which the regional governments can make decisions.</p> <p>In my role as Manager I provided a model for the region that was championed at several International conferences, and is heralded as a best practice case study for the region. As such, I was invited to present results and recommendations following from the DLCP to the Forum Education Minister's Meeting, held in Auckland in Nov 2007.</p> <p>The post required of me strong leadership and competence in project management, budgeting, reporting, technical leadership and advice, human resource development and training, community development and to work at all levels from the grassroots to senior government.</p> <p>www.schoolnet.net.sb</p>				

Continued...

Professional Experience

Oct 2000 – current	Solomon Islands	Long term variously funded	Technical Advisor to the People First Network (PFnet)	<p>PFnet is now an internationally-recognized best practice ICT4D project. It was established under the UNDP's Solomon Islands Development Administration and Participatory Planning Programme (SIDAPP) in Solomon Islands in 2001.</p> <p>I have been Technical Advisor from the beginning, when the PFnet concept was formulated in Nov 2000, initially employed under a UNDP SSA contract. When SIDAPP closed in Nov 2001, I took the project forward under the Rural Development Volunteers Association (RDVA), mobilizing donor funding and working with rural communities, developing linkages and building partnerships to secure a sustainable basis for PFnet.</p> <p>In my time as PFnet Technical Advisor the project has been nominated as a finalist in several international ICT4D competitions including the Stockholm Challenge, UNSECO Rural Communications Prize and the InfoDev ICT4D Stories Competition.</p>
<p>The People First Network, or PFnet, is a rural connectivity project, which aims to promote and facilitate equitable and sustainable rural development and peace building by enabling better information sharing and knowledge building among and across communities forming the Solomon Islands. The project has established an email system (now with over 30 stations nationally) based on a robust, proven and sustainable technology that permits remote locations on islands across thousands of square kilometres to have access to Internet emails using a simple computer, short-wave radio, and solar power, and PFnet is now working with partners to develop applications of the network in many sectors.</p> <p>PFnet has established a sustainable rural network, based on community ownership, strengthened through multiple partnerships. Important applications that have served rural people using PFnet include distance learning, rural banking and finance, improved participation in public debate linked to peace building and reconciliation (for instance UNDP's PeacePac project), commerce and farmer's information. It has also been linked to rural livelihoods activities such as seaweed farming, and is now recognized as an important network to be used for disaster preparedness and response.</p> <p>In my role as Technical Advisor, I have also advised on integrated rural communication strategies, and have contributed to the literature through research and participation in regional forums. For instance, in 2003 with technical assistance from UNDP, Fiji MCO, PFnet hosted a workshop on national ICT strategy building which started a process involving a wide stakeholder group that has improved awareness, professional networks and coordination of ICT in development in the country. The report was published in a major international journal. I then co-facilitated a similar workshop in PNG (see below).</p> <p>My post was variously funded through UNDP (under a 6 month SSA contract, Aug 02-Feb03) and governments of UK, Japan and R.O.C. and NZAid via their local missions.</p>				
March 2006 (part time)	Australia	Curriculum Corporation International, Melbourne	Consultant	Wrote the technical proposal for a bid for the AusAid ICT Capacity Development Project for Solomon Islands
Nov 2004	PNG	UNDP short term international TA	Consultant	Co-facilitator, National ICT Strategy Building Workshop, UNDP PNG Office - see list of publications (5)
Oct 2004	Solomon Islands	Machinery of Government Project. AusAid short-term	Consultant	Short term advice on the establishment of a Solomon Islands Government website, including an analysis of wider eGovernment implications. Website is now established (www.pmc.gov.sb)
July 2004	PNG	Improvement of Rural Primary Education Facilities Project (EU)	Consultant	Short term advice on ICT for the delivery of education to remote rural primary schools in PNG (Company – Geomar International)

Professional Experience

Jul 99 - Oct 00	Solomon Islands	UNDP / UNIDO project (SSA)	Webmaster / ICT officer	Established and localized a website www.commerce.gov.sb and online business information service to support SME development in rural areas for the Solomon Islands Ministry of Commerce.
Feb 96 – Dec98	Solomon Islands	VSO	Volunteer	VSO maths/science teacher in 2 rural secondary schools. Installed solar power supplies in 2 rural schools.
Jan90 - Feb96	UK	Health and Safety Executive	Senior Scientific Officer	Research scientist, HSE's Research Laboratory. Quantified Risk assessment applied to the transport of dangerous goods. Advised the HSE Major Hazard Assessment Unit and developed computer tools for the assessment of hazards, which are used in public enquiries and strategic planning with regard to health and safety.
Aug88 -Jan90	UK	Building design Partnership, Manchester	Acoustics consultant	Assistance to the acoustics group. Various noise surveys, computer modelling of noise from Channel Tunnel, etc.
Oct 87 - Aug88	UK	University of Sheffield	Research Assistant	Post-graduate research, computer modeling of auditorium acoustics
Jun86 -Oct 87	UK	Enviro-systems Ltd. Lancaster	Electronics engineer	Diagnostics and repair of electronics.
Sep83 -Jun 84	Norway	Christian Michelson Institute, Bergen	Undergrad research assistant	University "year out" industrial experience.

Professional Experience

Publications / International conferences

ICT for Development

1. *Challenges and Impacts of One Laptop Per Child*, Leeming D., Thomson I., Forster T. To be launched at the Pacific Forum Education Minister's Meeting in Tonga, March 2009, as part of the University of the South Pacific's PRIDE series of publications.
2. Guest Speaker, ICT Policy Workshop, University of Papua New Guinea, Feb 23rd 2008
3. *The Islands of Wisdom (and Learning), The role of Distance and Flexible Learning in the Solomon islands education system*, Leeming, D., Paper presented to the Pacific Forum Education Minister's Meeting, Auckland, New Zealand, 28th Nov 2007. Available with PowerPoint presentation from the author on request – or via the Pacific Islands Forum Secretariat.
4. *The Solomon Islands Distance Learning Centre Project, 3 presentations on implementation, experience and community response, and mainstreaming and exit strategy*, Pacific Internet Society PacINET 2007 conference, Honiara, Solomon Islands, 15-22 Aug 2007 (powerpoints can be downloaded from www.peoplefirst.net.sb/DLCP)
5. *The One Laptop Per Child (OLPC) Oceania Initiative*, Panel presentation chaired by Dr Jimmie Rodgers, DG, Secretariat of the Pacific Community, at the PacINET 2007 conference, Honiara, Au 2007
6. *OLPC Oceania's Participatory Development Plan*, article on OLPC News website http://www.olpcnews.com/implementation/plan/olpc_participatory_development.html
7. *Using ICT to deliver education services to remote areas*, Presentation made to the "Delivering Education Services to Remote Areas" forum, Divine Word University, Madang, Papua New Guinea, Aug 17-18, 2006
8. *Teacher Training via Distance Learning Telecentres in Solomon Islands* Presentation, eLearning Africa Conference, Addis Ababa, Ethiopia, May 25-26 2006
